ABOUT ME

I'm a passionate Full Stack Developer skilled in JavaScript, React, Node.js, and Java. I specialize in building responsive and user-friendly web applications, always staying up-to-date with the latest technologies. I'm eager to apply my skills in a dynamic environment to solve problems and create impactful digital experiences.

EXPERIENCE

Freelance Web Developer

2024-2025

Marvellous Moments & Pixora

- Built and maintained personal projects such as Pixora (a photography showcase platform) and Marvellous Moments (a digital memory journal), utilizing technologies like React, Node.js, JavaScript, and Mongo DB.
- Developed user-friendly interfaces and integrated backend systems to deliver seamless digital experiences.
- Gained practical experience in web development, problem-solving, and learning to adapt to project needs.

Personal Projects:

- Pixora: Designed and developed a platform for photographers to showcase their work, with features like media uploading, filtering, and a clean, intuitive interface.
- Marvellous Moments: Created a digital memory journal platform to capture and preserve meaningful moments, integrating Firebase for media storage and building custom front-end and back-end functionality.
